

Fungus Game Instructions (4MP Extra Credit)

Name: _____ Date: _____

To make a Fungus Board Game, you will need to make the following game parts:

- Game Board**
 - 20 Q&A cards**
 - “Spinner”**
 - Instructions Manual**
-
- To make your game, make 20 question cards with the answer on the back of each card. The questions should be about fungus. You may use your notes or your book to help you make the questions.**
 - Make a game board by cutting out the “space boxes” from the sheet of paper given to you in class and gluing/taping them to the construction paper. Make up to five “go back 3 spaces” boxes, one “go back to start” box, one “start/finish” box, three “go forward 5 spaces” boxes, and two “stay here until someone spins a 5” boxes. The rest of the boxes should say, “Draw a card.” Glue/tape the boxes around the game board in a rectangle. Draw an arrow to show the direction of play.**
 - Make a spinner by cutting out the spinner arrow, attaching it to a piece of construction paper (thick paper) and then use a brass fastener to finish the spinner to the numbers dial. Add numbers to the dial. (Or, you can make your own spinner with other materials.)**
 - Make an Instruction Manual which explains how to play your game and lists the rules.**
 - Put the finished game into a folder with your name and period on it.**
